

10 AMAZING FACTS! ABOUT PANGOLINS!

1. There are 8 pangolin species:
● 4 in Africa & 4 in Asia.

2. A pangolin's tongue is longer than the pangolin.

3. A pangolin can consume 70 million ants per year.

4. Pangolins have no teeth. They 'chew' with gravel & keratinous spines located inside the stomach.

5. Pangolins close their ears & nostrils to keep insects out.

6. Pangolins mark their territories with urine, feces & stinky secretions from a special gland.

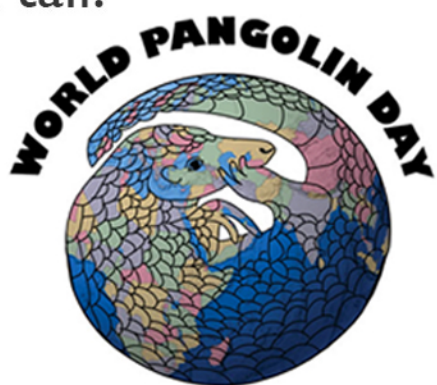

8. 20 % of a pangolin's weight is comprised of scales.

9. Pangolin scales are comprised of keratin - just like our nails.

10. Tens of thousands of wild pangolins are killed every year for trade in scales & flesh.
